## In the Claims:

To facilitate review, all of the pending claims are recited below, whether amended or not. Since the amendments of the previous Amendment will not be entered as a matter of the Applicant's right, the further amendments submitted here are noted as if the previous Amendment has not been entered. However, additional insertions are noted with <u>double underlining</u>.

bases obtained by screening an appropriate library containing the complete gene for a polynucleotide encoding the polypeptide sequence set forth in [SEQ ID NO:1] SEQ ID NO:2 under stringent hybridization conditions with a probe having the sequence of said polynucleotide sequence set forth in SEQ ID NQ:1 or a fragment thereof; and isolating said DNA sequence.

Please cancel claim 27 without prejudice or disclaimer.

- 28. (Amended) An isolated polynucleotide comprising a polynucleotide having at least a 95% identity to a <u>reference</u> polynucleotide encoding a polypeptide comprising amino acids 1 to 657 of SEQ ID NO:2, with identity determined over the entire length of the reference sequence.
  - 29. (Unchanged) The polynucleotide of Claim 28 wherein the polynucleotide is DNA.
  - 30. (Unchanged) The polynucleotide of Claim 28 wherein the polynucleotide is RNA.
- 31. (Amended) An isolated polynucleotide comprising a polynucleotide having at least a 95% identity to a <u>reference</u> polynucleotide encoding the same mature polypeptide expressed by the methionyl tRNA synthetase gene contained in NCIMB Deposit No. 40771, with identity determined over the entire length of the reference sequence.
  - 32. (Unchanged) A vector comprising the DNA of Claim 29.

33. (Amended) [A] An isolated host cell comprising the vector of Claim 32.

- 34. (Amended) A process for producing a polypeptide comprising: expressing from the <u>isolated</u> host cell of Claim 33 a polypeptide encoded by said DNA.
- 35. (Unchanged) A process for producing a cell which expresses a polypeptide comprising transforming or transfecting the cell with the vector of Claim 32 such that the cell expresses the polypeptide encoded by the DNA contained in the vector.
- 36. (Amended) An isolated polynucleotide comprising a polynucleotide having at least a 97% identity to a <u>reference</u> polynucleotide encoding a polypeptide comprising amino acids 1 to 657 of SEQ ID NO:2, with identity determined over the entire length of the reference sequence.
  - 37. (Unchanged) The polynucleotide of Claim 36 wherein the polynucleotide is DNA.
  - 38. (Unchanged) The polynucleotide of Claim 36 wherein the polynucleotide is RNA.
- 39. (**Amended**) An isolated polynucleotide comprising a polynucleotide having at least -a 97% identity to a <u>reference</u> polynucleotide encoding the same mature polypeptide expressed by the methionyl tRNA synthetase gene contained in NCIMB Deposit No. 40771, <u>with identity determined over the entire length of the reference sequence</u>.
  - 40. (Unchanged) A vector comprising the DNA of Claim 36.
  - 41. (Amended) [A] An isolated host cell comprising the vector of Claim 40.
- 42. (Amended) A process for producing a polypeptide comprising: expressing from the <u>isolated</u> host cell of Claim 41 a polypeptide encoded by said DNA.

C4

43. (Unchanged) A process for producing a cell which expresses a polypeptide comprising transforming or transfecting the cell with the vector of Claim 40 such that the cell expresses the polypeptide encoded by the DNA contained in the vector.

- 44. (Amended) A process for producing a tRNA synthetase polypeptide or <u>a</u> fragment <u>thereof</u>, which fragment retains binding and/or catalytic activity, comprising culturing a host of claim 41 under conditions sufficient for the production of said polypeptide or fragment.
- 45. (Amended) An isolated polynucleotide of claim 28 comprising a polynucleotide hybridizing under stringent conditions to a polynucleotide encoding a polypeptide comprising amino acids 1 to 657 of SEQ ID NO:2.
- 46. (Unchanged) An isolated polynucleotide comprising a polynucleotide encoding a polypeptide comprising amino acids 1 to 657 of SEQ ID NO:2.
- 47. (Unchanged) An isolated polynucleotide consisting of nucleotides 1 to 1974 set forth in SEQ ID NO:1.

Please cancel claim 48 without prejudice or disclaimer.

49. (Amended) An isolated polynucleotide comprising a DNA sequence of at least 30 bases obtained by screening an appropriate library containing the complete gene encoding an amino acid sequence set forth in SEQ ID NO:2 under stringent hybridization conditions with a probe having a polynucleotide sequence encoding the amino acid sequence set forth in SEQ ID NO:2 or a fragment thereof, which fragment retains binding and/or catalytic activity; and disolating said DNA sequence.

Ne.

- 50. (Unchanged) An isolated polynucleotide comprising nucleotides 1 to 1971 set forth in SEQ ID NO:1.
- 51. (Unchanged) An isolated polynucleotide comprising nucleotides 1 to 1974 set forth in SEQ ID NO:1.
- 52. (Unchanged) An isolated polynucleotide consisting of nucleotides 1 to 1971 set forth in SEQ ID NO:1.
- [least 30 bases] obtained by screening an appropriate library containing the complete gene encoding an anaino acid sequence set forth in SEQ ID NO:2 under stringent hybridization conditions with a probe having a polynucleotide sequence encoding the amino acid sequence set forth in SEQ ID NO:2 or a fragment thereof, which fragment retains binding and/or catalytic activity; and isolating said RNA sequence.
- 54. (Amended) An isolated polynucleotide comprising a DNA sequence of at least pleast 30 bases obtained by screening an appropriate library containing the complete gene encoding an amino acid sequence set forth in SEQ ID NO:2 under stringent hybridization conditions with a probe having a polynucleotide sequence set forth in SEQ ID NO:1 or a fragment thereof, which fragment is a 17-mer or longer.
- 55. (Amended) A polynucleotide which is complementary to a polynucleotide of claim [1, 2, 3, 4, 5, 6, 7, 8,] 26, 28, 29, 30, 31, 32, 36, 37, 38, 39, 40, 45, 46, [48,] 49, 50, 51, 52, 53 or 54.
